Country pained at R-Day insult to Tricolour: Modi

PRESS TRUST OF INDIA
New Delhi, 31 January

Prime Minister Narendra Modi said on Sunday that the country was saddened by the "insult" to the Tricolour on Republic Day, referring to the religious flag incident at Red Fort during the farmers' tractor parade. In his monthly 'Mann ki Baat' broadcast, Modi maintained that his government is committed to "modernising" farming and has been taking many steps.

"The efforts of the government will also continue in future," he said, amid intense protests by a section of farmers from states like Punjab, Haryana and UP near the Delhi border against three farm reform legislations enacted by his government. Farmer unions have demanded that these laws be repealed.

While recounting a number of developments in January this year, including India's remarkable come-from-behind series win over Australia in the recent Test series, Modi made a brief reference to the farmers' tractor rally on Republic Day which witnessed incidents of violence.

"Amidst all this, the country was saddened by the insult to the Tricolour on January 26 in Delhi. We have to infuse times to come with new hope and novelty. Last year, we displayed exemplary patience and courage. This year too, we have to work hard to attain our resolves. We have to take our country forward at a faster pace," he said.

humanity; and the world will benefit more," Modi said. Speaking of the recent announcement of Padma award winners, he said the tradition of conferring the honour on unsung heroes that was started a few years ago has been maintained this time too.

"I urge all of you to know more about these people and their contribution," he said.

Noting that the country is approaching its 75th year of Independence, Modi urged people, especially youngsters, to write about freedom fighters and incidents associated with their struggle.

cise underway, the prime minister said the country has not only rolled out the world's largest vaccination drive but is also vaccinating its citizens at the fastest rate.

The country has vaccinated over 30 lakh corona warriors in 15 days, he said, adding the US and the UK took 18 and 36 days to reach this figure.

"Just as India's fight against Corona became an example, our vaccination programme too is turning out to be exemplary to the world," he said.

Noting India's decision to send vaccines to several countries and the praise it has received from their governments and citizens, he said during the moment of crisis India is able to serve the world since it is capable and self-reliant in the field of medicines and vaccines.

"The same thought underpins the Atmanirbhar Bharat Campaign. The more India is capable, the more will it serve humanity; and the world will benefit more," Modi said. Speaking of the recent announcement of Padma award winners, he said the tradition of conferring the honour on unsung heroes that was started a few years ago has been maintained this time too.

"I urge all of you to know more about these people and their contribution," he said.

Farmer unions ready for talks but with riders

AGENCIES
New Delhi, 31 January

A day after Prime Minister Narendra Modi said doors for talks with the government were open for the protesting farmers despite the violent incidents in January 26, the unions showed willingness to continue the discussions but said nothing short of repeal of the laws will suffice.

The Samyukta Kisan Morcha (SKM), one of the main groups representing the farmers, said at a press conference that the farmer associations are open for discussions. However, they will continue to demand repeal of the Acts along with legal guarantee for MSP.

Meanwhile, a freelance journalist was arrested from the Singhu border on Sunday for allegedly misbehaving with the police personnel on duty at the farmers' protest site there, officials said. A case was registered against him and he has been arrested now, a senior police officer said, a day after the scribe was detained. Police had earlier said that they placed barricades at the border following the violence on Friday to ensure that no one could get through.

Recap plan...

Seeking an exemption from the RBI for the government-owned bank would mean a host of other private-owned payments banks asking for the same relaxation, the official said.

The government is also exploring if the payments bank and RRBs can be brought under a holding company (holdco). *Business Standard* had earlier reported the government was working on a policy to bring RRBs under a holdco. Bringing them in the same wigwam would help the payments bank in advancing loans, which banks of this genre are not allowed to do, the official said.

The standalone payments bank model is challenging because it has no strong differentiating product, said Prakash Agarwal, head (financial institutions), India Ratings and Research. Payments banks have thin margins owing to intense competition in the digital payments space, he said.

"Transaction services are facing strong competition from wallet service providers, and the payments bank model needs to evolve by some tweaking for standalone entities to be commercially viable," Agarwal said. At present, there are six functioning payments banks in the country.

Google...

"Our approach to creating a safer normal is predicated on the fact that cyberattacks are going to accelerate. People cannot do this patchwork of security solutions that they've had for the past two decades. A zero-trust operating system like BeyondCorp allows you to make your safety posture better," said Sunil Potti, vice-president and general manager of Google Cloud Security.

Google competes with global rivals, such as Amazon Web Services, Microsoft, and Alibaba, to dominate Cloud

computing services. In India, Google is eyeing areas such as banking, financial services and insurance, manufacturing, health care, public sector, media and entertainment, telecommunications, and retail.

"This (BeyondCorp) has changed the game, in terms of how India can serve the world, in addition to India protecting itself," said Potti. He said the distributed global workforce construct was limited by speed and security. One had to move applications closer (to the market) like having a Cloud region. But one couldn't solve security in a foundational way, which made the global workforce less productive. For instance, a call centre provider will have access to one or two applications (apps) and for using other apps, it will require workflow changes.

"In a world of zero-trust, productivity gains are 10-100x. It's a question of policy change," said Potti. BeyondCorp enables organisations to have a flexible workforce that can be located anywhere. "I think zero-trust operating systems will actually unleash a new era of global productivity and countries like India have a good chance to benefit from it."

To move the core aspects of various industries, including financial services and insurance to a particular market, there were concerns related to intellectual property and trade secrets. Many industries with sensitive data had to be centralised at the expense of productivity. With the new approach of zero-trust security, Potti said India can become a productivity hub and Google will play a key role to enable that with its BeyondCorp platform.

Zero-trust is founded on the concept that no device or user, whether outside or inside a network, can be trusted. It's a preventative method useful for controlling access to data, networks, and applications.

Google started developing BeyondCorp in 2010. Before that, it had fallen victim to Operation Aurora in 2009, along with other companies.

Operation Aurora was a series of cyberattacks from China that targeted US private sector companies.

Many years later, when Covid-19 struck, 100,000-plus Google employees working in different offices globally were able to move quickly and safely to a work-from-home model. But there was no change in performance and functionality.

"We actually improved our productivity. We didn't have to run between meetings," said Potti, adding, "At Google, whether we are at work, home or Starbucks, it is all the same from a BeyondCorp perspective."

Crypto...

The Bill also seeks to prohibit all private cryptocurrencies in India, however, it allows for certain exceptions to promote the underlying technology of cryptocurrency and its uses."

Subhash Garg, former secretary to the Department of Economic Affairs, told *Business Standard*, "I have to see the Bill. In the previous Bill, a ban of cryptocurrencies was proposed. However, there was a space left to treat cryptos as commodities but that was not categorically mentioned."

He said cryptos as currencies should not be permitted in India. Industry is debating what a private cryptocurrency is and whether a bitcoin-like asset is one such. Some experts have pointed out the wording of the earlier Bill and the latest one were different. The difference is while all cryptocurrencies were proposed to be banned earlier, it is for private cryptocurrencies now. Siddharth Sogani, founder, CREBACO, a global platform for rating cryptocurrency exchanges and blockchain, said, "Private currencies are issued by private organisations or individuals who operate them for settling transactions. Bitcoin is not a currency. It's a crypto asset. As people use it for settlement, they have started calling it 'currency'. It's a digital commodity or store value first. Further, bitcoin is decentralised, not run by any individual but a network."

However, Sogani said there were smart contract-based coins/currencies run by individuals but they were scams. The government must have regulations to stop them. Kumar Gaurav, founder and CEO, Cashaa, the banker to the cryptocurrency industry, said: "Cryptocurrency is a global and decentralised system, and there is no way any government can ban it. That would require a kind of technology and control that does not rest with anyone. What we understand is that the government is trying to crack down on scams running in the name of bitcoin, considering that 90 per cent of these scams do not even operate on a proper cryptocur-

rency." Industry is expecting positive developments on cryptos' treatment. Nishith Desai Associates, CREBACO (along with Khaitan & Co.), and a few industry leaders recently made representations to all government departments and agencies that proposed a "regulatory framework".

Gaurav Mehta, founder, National Digital Asset Exchange (NADX), said: "The decision to ban 'private cryptocurrencies' is a step to prohibit crypto scams facilitated by individuals. But in the case of bitcoin, ethereum, and other decentralised currencies, the definition of 'private' is vague and can be contested in a court of law." The NDAX provides blockchain forensics and taxation solutions to government departments.

He, however, said: "More than 6 million investors have invested more than ₹90,000 crore and the fate of such investors is uncertain. By proposing such a shallow regulation, India is positioning itself in league with Algeria, Bangladesh, Ecuador, and Nepal." Scam possibilities are large and retail investors who do not understand cryptocurrencies are falling prey to wrongdoing. There was a bitcoin mining scam also.

GST...

The robust collection is important since the Centre's fiscal deficit has crossed the Budget estimate by 45.5 per cent till December 2020-21. While it is not expected that the government will rein in the deficit at 3.5 per cent of GDP as was projected in the estimates, the collection will play a role in narrowing the deficit in the wake of increased expenditure on health, muted disinvestment receipts, low direct taxes, and stimulus packages.

"GST revenues during January 2021 are the highest since the introduction of GST and have almost touched the ₹1.2 lakh crore mark. The GST revenues above ₹1 lakh crore for a stretch of last four months and a steep increasing trend over this period are clear indicators of rapid economic recovery post pandemic," the Ministry of Finance said in a release. The ministry also attributed the collection to the closer monitoring of fake billing, deep data analytics using data from multiple sources including GST, income-tax and Customs IT systems, and effective tax administration.

"In addition to the sustained economic revival witnessed in the past few months, the increased collections are also on account of the initiatives taken by the tax administration to curtail evasion, monitor input tax credits and build taxpayer profiles based on other databases," said M S Mani, senior director at Deloitte India.
